

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

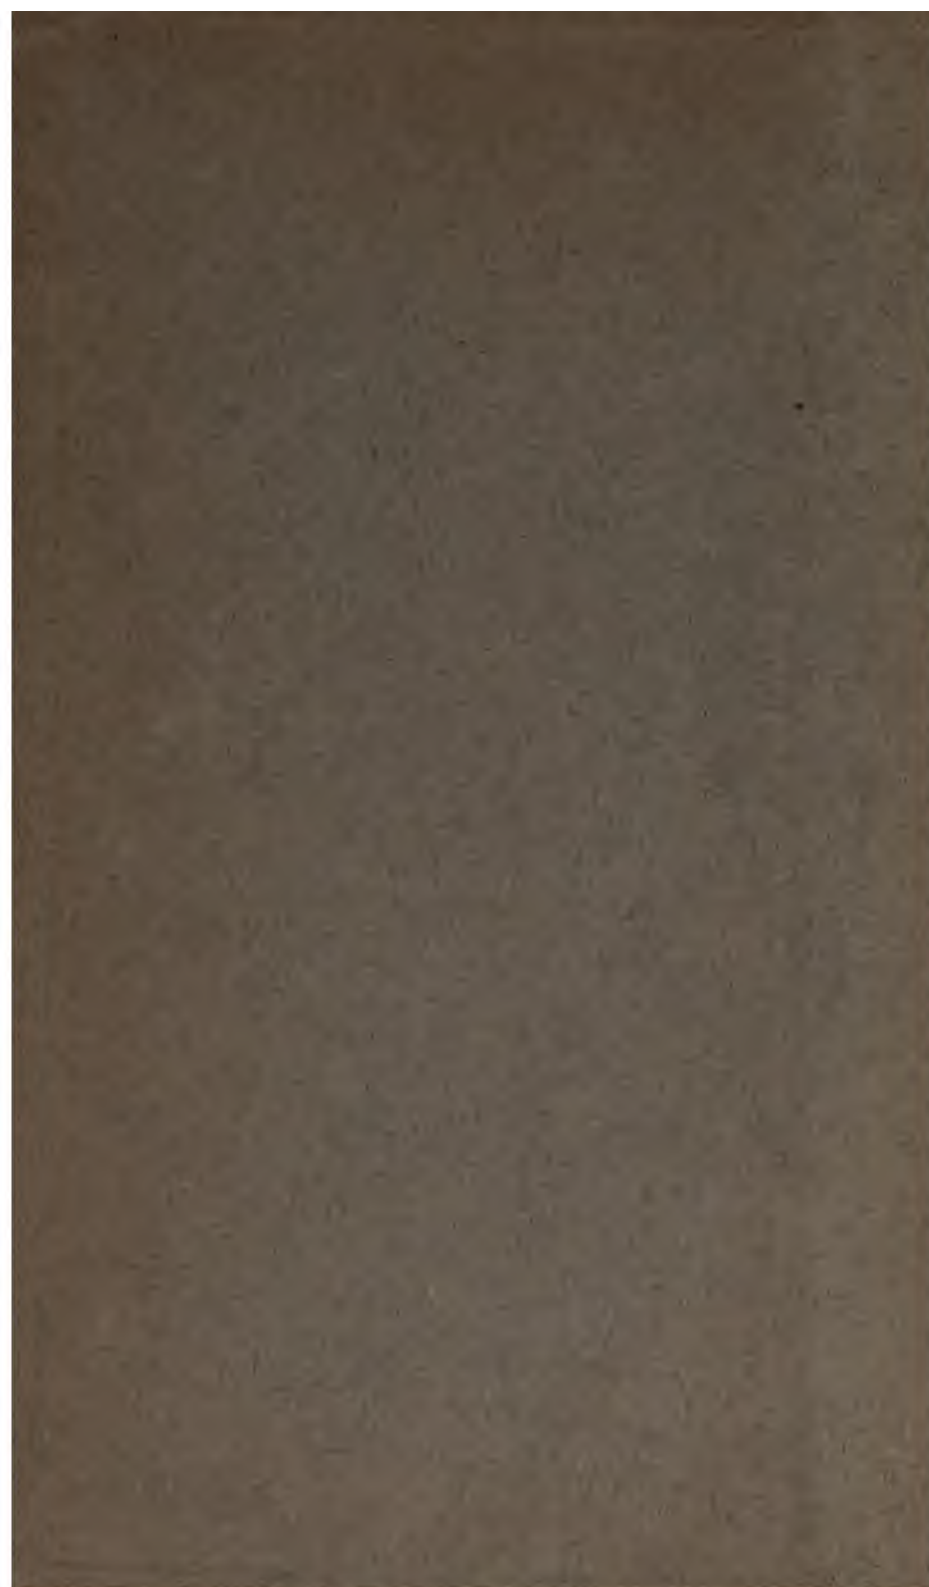

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

# THE STATE OF NEW HAMPSHIRE.

---

OFFICE OF THE REGISTRAR OF VITAL STATISTICS,

CONCORD, November 1, 1894.

*To His Excellency the Governor and the Honorable Council :*

I have the honor to submit herewith, in accordance with the laws of the state of New Hampshire, the fourteenth annual report relating to the registration of births, marriages, divorces, and deaths in this state for the year ending December 31, 1893.

The number of births reported in this state for the year 1893 was 8,348, or 602 more than was reported in 1892; the number of marriages was 4,090, or 16 more than was returned in 1892; the number of deaths was 7,663, or 325 less than in 1892.

The total population of the state, according to the census of 1890, is 376,530, and the proportion of births, marriages, and deaths to each one thousand of the population is as follows :

Birth-rate, 22.17 ; marriage-rate, 10.86 (couples) ; divorce-rate, 1.01 ; death-rate, 20.35.

The tables have been arranged substantially as in the last registration report.

Reference should be had to the index at the end of this volume for any subject included in this report.

Respectfully submitted,

*Irving A. Watson*

*Registrar of Vital Statistics.*

## SUMMARY OF REGISTRATION REPORT.

---

The record of the vital statistics, carefully maintained from year to year, becomes of great importance to the state by indicating the movement of the population as well as determining certain conditions necessary to be known in order to formulate and carry out such laws, rules, and regulations as may be necessary for the greatest good of a community. Especially is this true in relation to the death records which form the true indicator in many instances for sanitary work. We are fortunate in this state in having already arrived at that period when the vital statistics have come to be of sufficient accuracy and completeness to make them valuable from a sanitary standpoint.

We are able to include in our observations the statistics of a decade, and to derive from them much that is of importance relating to the prevalence of the cause of mortality, and thus suggest to the health authorities certain lines of action in order to reduce an excessive mortality in a given locality.

The following tables, covering a series of years, chiefly from 1882 to 1893 inclusive, furnish reliable statistics relating to many phases of questions connected with the birth, marriage, divorce, and death records for the period named.

TABLE No. 1.  
*Population of Counties in 1880 and 1890.*

COUNTIES.	1880.	1890.
Rockingham .....	49,064	49,650
Strafford .....	35,558	38,442
Belknap.....	17,948	20,321
Carroll .....	18,224	18,124
Merrimack .....	46,300	49,435
Hillsborough.....	75,634	93,247
Cheshire.....	28,734	29,579
Sullivan .....	18,161	17,304
Grafton.....	38,788	37,217
Coös.....	18,580	23,211
Total.....	346,991	376,530

Table No. 1 shows the population by counties according to the United States census of 1880 and 1890. It is from these tables that our deductions as to the population for each year are arrived at.

TABLE No. 2.  
*Population of New Hampshire for each Year from 1880 to 1893 inclusive.*

YEARS.	Population.	YEARS.	Population.
1880.....	346,991	1887.....	367,728
1881.....	349,952	1888.....	370,689
1882.....	352,913	1889.....	373,650
1883.....	355,874	1890.....	376,530
1884.....	358,845	1891.....	379,491
1885.....	361,806	1892.....	382,452
1886.....	364,767	1893.....	385,413

Table No. 2 represents the population of New Hampshire for each year from 1880 to 1893 inclusive, and is calculated from the census returns of 1880 and 1890. In this table the population for each year except 1880 and 1890 is calculated, and is believed to be approximately correct. The figures in the table mentioned are estimated upon the basis that there has been a steady increase in the population in the same ratio as was shown between the census returns of the two years named.

TABLE No 3.

*Births, Marriages, and Deaths, with the Population and Rates, for 1884 to 1893, inclusive.*

YEARS.	Population.	Births.	Marriages.	Deaths.	Birth-rate per 1,000.	Persons married to 1,000.	Death-rate per 1,000.
1884.....	358,845	6,247	3,292	6,194	17.40	18.34	17.26
1885....	361,806	6,319	3,180	6,201	17.46	17.56	17.13
1886.....	364,767	6,657	3,324	6,426	18.24	18.22	17.61
1887.....	367,728	6,910	3,495	6,479	18.78	19.00	17.61
1888.....	370,689	6,443	3,379	6,854	17.38	18.22	18.48
1889.....	373,650	6,912	3,621	6,696	18.49	19.36	17.91
1890.....	376,530	6,946	3,621	7,368	18.44	19.22	19.56
1891..	379,491	7,510	3,904	7,310	19.94	20.72	19.41
1892.....	382,452	7,746	4,074	7,988	20.25	21.30	20.88
1893.....	385,413	8,348	4,090	7,663	22.17	21.22	20.35

Table No. 3 shows the population, number of births, marriages, deaths, with the birth-rate, marriage-rate, and death-rate to each 1,000 of the population, for the years 1884 to 1893, inclusive. It will be seen by this table that there has in the last two years been an increase in the totals, with the exception of deaths. The number of births reported is greater than for any previous year. This is probably due largely to more complete returns in 1893 than in any previous year.

## BIRTHS.

There were returned for the year 1893, 8,348 births, or 620 more than was reported the previous year.

The birth-rate for the state was 22.17 to each 1,000 of the population for the entire state.

TABLE No. 4.

*Births in Cities for 1893, with rate per 1,000.*

CITIES.	Population of 1890.	Births.	Birth-rate per 1,000.
Portsmouth.....	9,827	175	17.81
Dover.....	12,790	301	23.53
Concord.....	17,004	448	26.35
Manchester.....	44,126	1,150	26.06
Nashua.....	19,311	698	36.15
Keene.....	7,446	151	20.28
Rochester.....	7,396	172	23.26
Laconia.....	6,143	214	34.83
Somersworth.....	6,207	206	33.51

Table No. 4 gives the population, number of births, and birth-rate per 1,000 of the population for the several cities of the state. It will be seen by this table that the highest birth-rate is to be credited to Nashua—the rate of 36.15 to each 1,000 of the population. The lowest birth-rate was in Portsmouth, with only 17.81 to each 1,000 of the population.

TABLE No. 5.

*Percentage of American and Foreign Births, by Counties, 1893.*

COUNTIES.	PARENTS.			Births with parentage not stated.
	American born.	Foreign born.	One foreign born.	
Rockingham .....	62.79	20.00	13.96	29
Strafford .....	40.18	44.95	13.01	18
Belknap.....	50.42	29.46	12.46	27
Carroll.....	68.91	16.03	9.61	17
Merrimack.....	49.57	34.05	13.66	29
Hillsborough.....	39.21	42.71	14.22	95
Cheshire.....	53.53	26.62	15.34	30
Sullivan.....	62.50	18.27	14.42	15
Grafton.....	70.28	11.11	13.75	35
Cooks .....	29.76	47.02	18.89	40
Total for state.....	48.56	33.27	11.76	335

Table No. 5 represents the percentage of parents by nativity. This table shows that less than one half (48.56) of the children born in the state during the year were of American parentage. 33.27 per cent. of the children born in the state in 1893 were of foreign parentage.

This table, in connection with the census statistics of nativity of the population of the state, offers a very interesting and instructive study.

## MARRIAGES.

The number of marriages returned for the year 1893 was 4,090, the largest number ever reported in a single year, and 16 larger than was returned the previous year.

TABLE No. 6.

*Marriage-rates for 1882 to 1893, inclusive.*

YEARS.	Marriages.	Persons married to 1,000 living.	Number living to one married.
1882.....	3,433	19.44	103
1883.....	3,495	19.68	102
1884.....	3,292	18.34	109

Average .....	3,575	18.35	103

Table No. 6 shows the total number of marriages from 1882 to 1893, inclusive; also the percentage of persons married to each 1,000 of the living population, together with the number living to each marriage.

The average number of marriages for the past eleven years is 3,575 annually.

TABLE No. 12.

*Proportion of American to Foreign Born Persons Married, for 1882 to 1893, inclusive.*

YEARS.	American-born.	Foreign-born.
1882.....	80.80	19.20
1883.....	80.30	19.70
1884.....	80.86	19.14
1885.....	81.92	18.08
1886.....	79.34	20.66
1887.....	76.82	23.18
1888.....	74.82	25.18
1889.....	74.80	25.20
1890.....	65.14	34.86
1891.....	73.12	26.87
1892.....	70.33	29.67
1893.....	71.37	28.63

Table No. 12 represents the proportion of American to foreign-born persons married from 1882 to 1893, inclusive.

This table is exceedingly instructive from the fact that it shows a progressive diminution in the number of children born of American parents, with an increase of children of foreign parentage.

By referring to table No. 5 it will be seen that, although 71.37 per cent. of the marriages were among American-born, only 48.56 per cent. of the children born for the year were of American parentage. On the other hand, 28.63 per cent. of the marriages were among foreign-born, with a birth record of 33.27 per cent. of children of foreign parentage.

In Strafford, Hillsborough, and Coös counties, the number of children of foreign parents was greater for the year 1893 than the number of American-born.

TABLE No. 13.

1890.....	3,621	19.22	382	1 to 9.48
1891.....	3,904	19.22	412	1 to 10.55
1892.....	4,074	21.30	317	1 to 11.74
1893.....	4,090	21.22	398	1 to 10.27

Table No. 15 shows the total number of divorces decreed from 1882 to 1893, inclusive, by counties, also the ratio of divorces to marriages for the same period. In the year 1893 one divorce was decreed to each 10.27 marriages, this being a slight decrease over the ratio of the two years previous. As a whole there has not been any very marked variation of ratios for the past eleven years.

Additional tables relating to the alleged causes of divorce for the year 1893, and also for the period of 11 years, may be found on pages 42 and 43 of this report.

TABLE No. 16.

*Ratio of Divorces to Marriages, by Counties, for 1893.*

COUNTIES.	Number of marriages.	Number of divorces.	Ratio of divorces to marriages.
Rockingham .....	546	42	1 to 13.00
Strafford. ....	467	39	1 to 11.97
Belknap .....	194	25	1 to 7.76
Carroll. ....	205	20	1 to 10.20
Merrimack. ....	478	53	1 to 9.02
Hillsborough .....	1,138	108	1 to 10.53
Cheshire. ....	255	28	1 to 9.10
Sullivan .....	151	15	1 to 10.06
Grafton. ....	356	39	1 to 9.12
Coös. ....	300	29	1 to 10.34
Total .....	4,090	398	1 to 10.27

Table 16 exhibits the number of marriages, number of divorces, and the ratio of divorces to marriages by counties for the year 1893.

The highest ratio of divorces to marriages was in Belknap county, with a rate of one divorce to every 7.76 marriages; while the lowest ratio was in Rockingham county, with a record of one divorce to every 13 marriages.

## DEATHS.

The number of deaths returned for the year 1893 was 7,663, 325 less than was returned the previous year.

The death-rate per 1,000 of the population for the year is 20.35.

TABLE No. 17.

*Deaths and Death-rates from 1884 to 1893, inclusive.*

YEARS.	Deaths registered.	Deaths to 1,000 of population.*	Population.*
1884.....	1,694	16.26	358,845
1885.....	6,201	17.13	361,306
1886.....	6,426	17.61	364,767

1891.....	7,310	19.41	379,491
1892.....	7,988	20.88	382,452
1893.....	7,663	20.35	385,413
Average .....	6,918	18.52	.....

\* Population estimated for all but census years.

Table 17 represents the total number of deaths registered each year from 1884 to 1893, inclusive, with the percentage for each year to each 1,000 of the population. This table is liable to give an erroneous impression if it is not borne in mind that the progressive increase in the percentage column is due rather to a more accurate and complete registration from year to year than to any other cause. In the earlier years represented in the table the registration of deaths was not so complete as it is now.

\* Population estimated for all but census years.

Table 18 shows the number of deaths and death-rate per 1,000 of the population from 1884 to 1893, inclusive, by counties.

The highest death-rate in any county for the year 1893 was in Hillsborough county, 22.55, followed by Merrimack, 21.50; Sullivan, 20.92; Rockingham, 20.80; Cheshire, 20.11; Strafford, 19.30; Grafton, 18.70; Belknap, 18.16; Coös, 17.02; Carroll, 16.83.

TABLE No. 19.

*Percentages of Deaths, by Quarters, from 1884 to 1893, inclusive.\**

YEARS.	PERCENTAGES OF DEATHS FOR QUARTERS ENDING WITH			
	March.	June.	September.	December.
1884.....	23.23	23.40	26.63	26.74
1885.....	27.27	26.66	24.32	21.75
1886.....	23.75	23.27	28.90	24.08
1887.....	24.56	24.02	27.77	23.65
1888.....	25.94	23.72	26.82	23.52
1889.....	23.70	24.16	27.38	24.76
1890.....	28.82	21.63	26.71	22.84
1891.....	22.36	24.15	26.89	26.58
1892.....	34.97	21.41	23.99	19.63
1893.....	23.53	24.26	27.65	24.56

\*Not including deaths with month not stated, premature and still births.

Table 19 shows the death percentages by quarters from 1884 to 1893 inclusive. With the cessation of the epidemic of influenza which prevailed in 1892, the percentages by quarters for 1893 assumed their relative normal places. The rate for the first quarter in 1893 is 23.53 as against 34.97 for the same period of the previous year (when the epidemic of influenza prevailed). The second quarter shows 24.26; the third quarter, 27.65; and the fourth quarter, 24.56.

TABLE No. 20.

*Mortality of Males and Females compared, 1884 to 1893, inclusive.*

YEARS.	Male decedents.	Female decedents.	Male decedents to 100 female decedents.	Death-rate of males to 1,000 male population.	Death-rate of females to 1,000 of female population.
1884.....	3,034	3,122	97.18	17.79	17.69
1885.....	2,948	3,194	92.29	17.28	18.09
1886.....	3,155	3,212	98.20	18.50	18.20
1887.....	3,174	3,267	97.15	18.61	18.51
1888.....	3,419	3,382	101.09	20.04	19.16
1889.....	3,253	3,389	95.98	19.07	19.20
1890.....	3,692	3,624	101.87	21.65	20.53
1891.....	3,557	3,453	103.01	19.60	17.65
1892.....	3,981	3,990	99.77	21.33	21.00
1893.....	3,827	3,812	99.61	20.51	20.42
Average.....	3,404	3,444	98.61	19.44	19.04

Table No. 20 exhibits the mortality of males and females compared for the years 1884 to 1893, inclusive. It will be seen by this table that the mortality among the females was slightly greater than among the males, the percentage for the period given of the male decedence to each 100 females being 98.61; and for the year 1893, 99.61.

The death-rate of the males to each 1,000 of the male population for the 10 years given in the table was 19.44.

The death rate of females to each 1,000 of the female population for the same period was 19.04.

TABLE No. 21.

*'Deaths at Age Periods, by Percentages, from 1883 to 1893, inclusive.\**

YEARS.	Under 1.	1 to 5.	5 to 10.	10 to 20.	20 to 30.	30 to 40.	40 to 50.	50 to 60.	Over 60.

1890.....	16.23	6.67	1.99	4.28	7.04	7.42	6.62	9.17	40.49
1891.....	18.30	7.08	2.55	4.40	6.95	6.01	6.29	8.15	40.25
1892.....	16.17	6.64	2.18	4.39	6.70	6.63	6.60	8.76	41.77
1893.....	17.83	7.13	1.93	4.32	7.20	6.62	6.94	8.10	39.86

\* Not including those with age not stated, premature and still births.

Table No. 21 is interesting in showing how uniformly the mortality by age periods occurs, even when distributed over a series of years.

TABLE No. 22.

*Deaths at Different Periods, compared with the number Living at the Same Period, 1893.\**

	1893.	Persons living at same ages, census of 1890.	Death-rate per 1,000.
Under 1 year.....	1,296	6,141	211.04
Under 5 years.....	1,812	30,573	59.26
20 to 30 years.....	521	63,252	8.24
All others.....	5,025	253,166	19.85
All ages.....	7,358	376,530†	19.54

\* Excluding still births and premature births. †Census of 1890.

Table No. 22 shows the number of deaths at different age periods compared with the number of living at the same period, for 1893. It shows the death-rate per one thousand of the population under one year of age to the living persons of the same age period to be 211.04 as against 199.47 for the previous year, showing a slight increase. Under 5 years of age, 59.26 as against 56.47 for the previous year; between 20 and 30, 8.24 as against 7.99 for 1892. All others 19.85 in 1893 as against 21.59 in 1892. For all ages the rate was 19.54 in 1893 as against 20.44 in the preceding year.

\* Excluding those with age and sex not stated, and premature and still births.

Table No. 24 shows the percentages of deaths by age periods and by sex to the total mortality from 1884 to 1893 inclusive.

TABLE No. 25.

*Deaths of Children under Five Years of Age, by Seasons, 1893.\**

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.
Months . . . . .	109	104	119	131	126	98	229	301	247	129	95	115
Quarters . . . . .	332				355		777				339	
Percentages . . . .	18.41				19.69		43.10				18.80	
Half-years . . . . .			687						1,116			
Percentages . . . .			38.10						61.90			
Total deaths..					1,803							

\* Not including deaths with month not stated, premature and still births.

Tables Nos. 24 and 25 should be studied in connection with each other, and are instructive as they give the number of deaths and the percentage to the total mortality by age periods for the nine years embraced in the tables. These tables show vividly the fearful mortality of early childhood. This is especially emphatic in the table of percentages.

Table No. 25 represents the mortality of children under 5 years of age, by seasons, for the year 1892. The highest mortality was in the quarter including July, August, and September, and was 43.10 per cent. as against 37.66 for the previous year. The next highest rate was in the second quarter of the year, at 19.69, followed by the fourth quarter, at 18.80, and the first quarter at 18.41.

The total mortality by half years was as follows :

First half of the year, 687.

Last half of the year, 1,116.

TABLE No. 26.  
*Total Deaths by Seasons, 1893.\**

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.
Months .....	584	571	571	638	646	496	684	718	627	551	515	736

Percentages..		23.53			24.26			27.65			24.56	
Half-years....			3,506						3,831			
Percentages..			47.79						52.21			
Total deaths..						7,337						

\* Not including deaths with month not stated, premature and still births.

Table No. 26 gives the total number of deaths of all ages by seasons for the year 1893. There was a total of 7,337 deaths as against 7,682 for the previous year.

By quarters the death-rate was the heaviest in the third quarter of the year, which rate is augmented by a large death-rate from intestinal diseases among children. For the other quarters of the year the mortality variation is exceedingly small.

TABLE No. 27.

*Nativity of persons Deceased for 1893, by Counties.*

COUNTIES.	Total deaths.*	NATIVE BORN.		FOREIGN-BORN.	
		Deaths.	Per cent-ages.	Deaths.	Per cent-ages.
Rockingham.....	1,033	816	89.08	100	10.92
Strafford .....	742	525	80.40	128	19.60

TABLE No. 30.  
*Causes of Death, by Classes, from 1884 to 1893, inclusive.*

	1884	1885	1886	1887	1888	1889	1890	1891	1892	1893
I.—Zymotic diseases.....	907	890	1,095	1,073	1,097	1,172	1,155	1,301	1,344	1,089
II.—Constitutional diseases ....	1,276	1,271	1,284	1,222	1,200	1,114	1,309	1,095	1,167	1,237
III.—Local diseases.....	2,594	2,637	2,610	2,731	2,994	2,852	3,146	3,149	3,531	3,370
IV.—Developmental diseases....	857	848	948	952	1,016	1,041	1,150	1,141	1,057	1,054
V.—Violent deaths.....	201	225	206	218	234	233	271	271	283	327

Table No. 30 gives the causes of death by classes from 1884 to 1893, inclusive. There was a large falling off in the number of deaths from zymotic diseases in 1893 from the returns of the three previous years, and 255 less than for 1892.

There was an increase in mortality in 1893 over the previous year in constitutional diseases. The variations in the other classes are less marked.

TABLE No. 31.

*Percentage of Causes of Death, by Classes, from 1884 to 1893, inclusive.\**

YEARS.	CLASSES.				
	Zymotic.	Constitutional.	Local.	Developmental.	Violent deaths.
1884.....	15.9	22.4	45.7	12.3	3.5
1885.....	13.9	22.2	46.0	12.2	3.6
1886.....	18.2	21.4	43.4	13.4	3.4

SUMMARY OF OBSERVATIONS.

Table No. 32 gives the causes of death, by classes and counties for 1893, with the percentages of each to the total number of deaths, and including deaths from unspecified causes, premature and still births, which accounts for the differences in the percentages in tables 31 and 32; the former gives the percentage of each class to the total number of specified causes, excluding premature and still births, while the latter gives the percentage of each class to the total number of all classes.

The highest percentage in the zymotic class is in Coös county, 23.79; the lowest in Carroll county, 10.49. In the constitutional class the highest rate is in Belknap county, 21.14; the lowest in Coös county, 12.41. Of local diseases the highest rate is in Carroll county, 51.47; the lowest in Hillsborough county, 37.80.

In developmental diseases the highest percentage is in Hillsborough county, 15.46; lowest in Carroll county, 8.85.

In the violent class the highest rate is in Strafford county, 10.59; the lowest in Belknap county, 2.44.

Average	358	65	51	136	59	29	15	145	26	27	31	36

\* Including fever, bilious, intermittent, malarial, and typho-malarial fevers.

Table No. 33 shows the mortality from the more prominent zymotic diseases from 1884 to 1893, inclusive. The total number of deaths coming under this class for the year 1893 is 938—practically the same as the preceding year. The largest number of deaths in this table are from cholera infantum, to wit: 423 for the entire state, which, with the exception of the year 1891, is the largest number of deaths ever returned from this cause.

Croup is responsible for 36 deaths, a figure lower than was ever before returned.

Diarrhœa is charged with 50 deaths, the average for the ten years included in the table being 51.

Diphtheria, with only 63 deaths for the year, is a record far below that heretofore recorded in any one year, and is less than one half the number reported for the previous year. The average death-rate for the ten years referred to is 136.

Dysentery is responsible for 63 deaths in 1893.

Erysipelas 29 deaths, which is the exact average for the entire period covered by the table.

Cerebro-spinal fever is chargeable with only three deaths for 1893 as against 19 the previous year.

There were 121 deaths returned from typhoid fever,— a slight increase over the preceding year, but considerably lower than the average for the ten years.

Measles caused 32 deaths as against 24 the preceding year, with an average of 26 for ten years.

Whooping cough caused 23 deaths in 1893, the average given in the table being 27.

Scarlet fever was responsible for 52 deaths in 1893 as against 27 the preceding year, and is a larger number than has been reported since 1885. The average annual mortality from this disease for the ten years included in the table is 31.

Septicæmia was the cause of 43 deaths in 1893 as against 47 the previous year.

TABLE 34.

*Mortality from Principal Constitutional Diseases from 1884 to 1893, inclusive.*

YEARS.	DISEASES.									
	Dropsy.	Anæmia.	Cancer.	Mortification.	Rheumatism.	Scrofula.	Tabes mesenterica.	Phthisis (pulmonary).	Hydrocephalus.	Tubercular meningitis.
1884 .....	80	43	213	18	26	26	4	865	27	*
1885 .....	90	32	212	24	28	22	2	857	25	*
1886 .....	83	28	206	27	47	16	11	809	33	19
1887 .....	79	17	218	29	47	16	7	766	23	16
1888 .....	75	34	203	22	43	21	14	742	30	13
1889 .....	62	40	213	21	43	22	13	651	21	24
1890 .....	53	28	276	33	30	15	6	825	13	30

1892 .....	43	35	235	24	25	17	10	736	16	24
1893 .....	49	26	283	30	27	14	21	737	23	27
Average.....	65	32	227	23	34	18	11	768	23	17

\* Not classed separately.

Table No. 34 shows the mortality from the principal constitutional diseases for the ten years included in the table.

Phthisis (which no longer belongs under this classification) was responsible for 737 deaths in 1893—one more than was returned in 1892, as against an average of 768 for the period covered by the table.

There were 283 deaths chargeable to cancer in 1893 as against 235 for the previous year. It will be noticed that there is a remarkable uniformity in the number of deaths from cancer from year to year, although the return for 1893 is the highest yet recorded.

TABLE No. 35.

*Mortality from Principal Local Diseases from 1884 to 1893, inclusive.*

YEARS.	DISEASES.												
	Apoplexy.	Paralysis.	Convulsions.	Cephalitis.*	Brain disease.	Heart disease.	Bronchitis.	Pneumonia.	Enteritis.	Gastritis.	Peritonitis.	Liver disease.	Bright's disease, nephritis and other kidney diseases.

													2,583

\* Meningitis and cerebritis included.

Table No. 35 gives the mortality of the principal local diseases from 1884 to 1893, inclusive. The total number of deaths returned under this classification in 1893 was 2,926 as against 3,105 for the previous year.

The chief cause of mortality in these tables is pneumonia, which is chargeable with 685 deaths in 1893 as against 890 for the previous year. This return shows a large falling off

over the death-rate of 1892; but the rate is still a little higher than the average for ten years.

Heart disease shows 605 deaths in 1893 as against 571 for the previous year.

Apoplexy shows 331 deaths in 1893 as against 308 in 1892. The average number of deaths from this cause for ten years is 251.

Bright's disease caused 194 deaths in 1893 as against 222 the previous year.

TABLE No. 36.

*Mortality from Principal Developmental Diseases from 1884 to 1893, inclusive.*

YEARS.	DISEASES.

Table No. 37 and diagram No. 1 show the mortality from twenty of the most prominent causes of death from 1884 to 1893 inclusive. In these tables consumption stands at the head, as it always has, with the single exception of 1892, when pneumonia ranked first.

Consumption is responsible for 737 deaths in 1893, while the average for ten years has 768 deaths. The table alluded to shows the order of fatality from the diseases given for the period named. A further consideration of some of these diseases will be found in the following tables.

DIAGRAM No. 1.—SHOWING THE COMPARATIVE MORTALITY, BY ABSOLUTE NUMBER OF DECEDENTS FROM TWENTY PROMINENT CAUSES OF DEATH DURING YEAR ENDING DECEMBER 31, 1893.

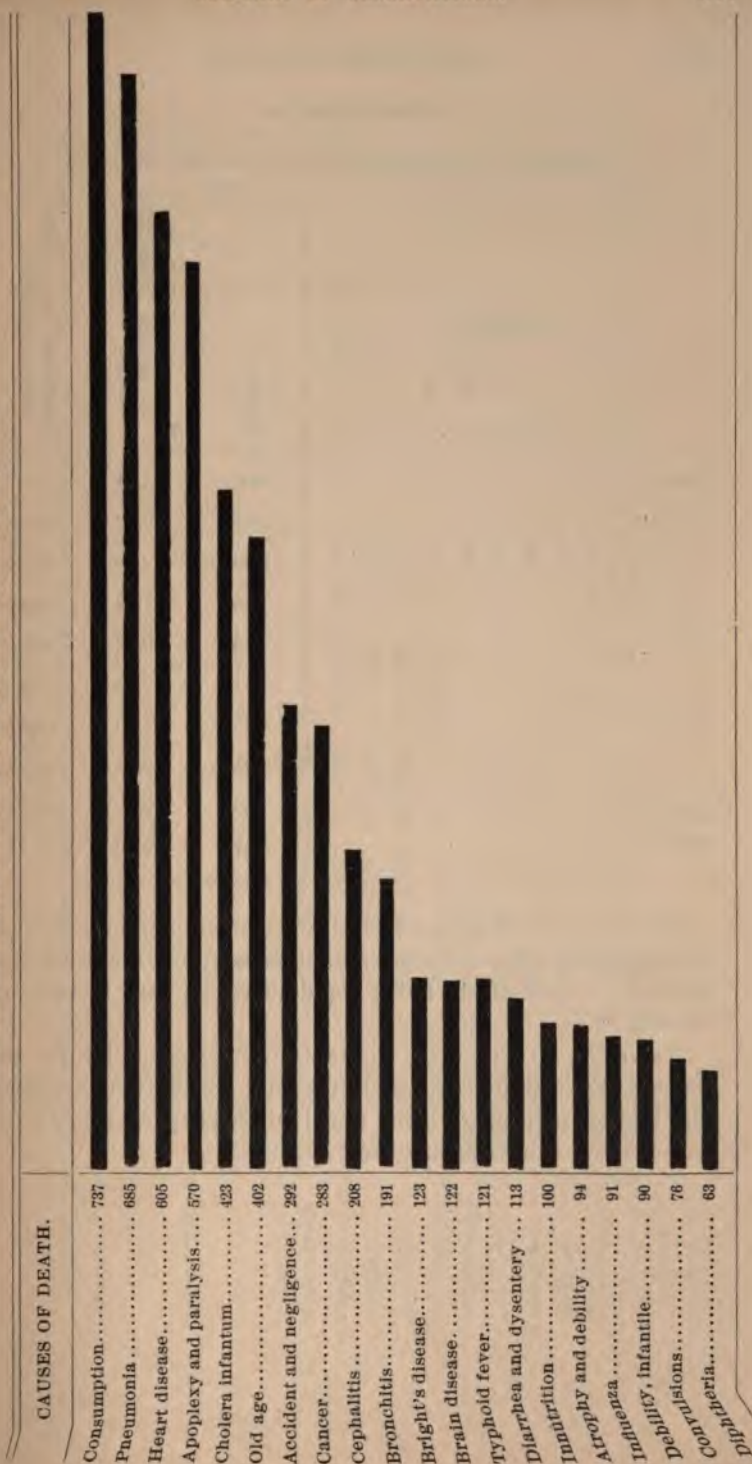

TABLE No. 38.

*Mortality from Consumption from 1884 to 1893, inclusive.*

YEARS.	Deaths.	Percentages of deaths to deaths from all causes.	Death-rate per 10,000 living population.
1884.....	865	14.01	24.18
1885.....	857	13.82	23.68
1886.....	809	12.58	22.17

\* Divorced, 3.

Table No. 52 gives the number of deaths from consumption for the year 1893, by counties, nativity, civil condition, and sex.

Out of a total of 737 who died of consumption in 1893, 527 were American born, 151 foreign born, and 59 with nativity not stated.

There were 341 married, 255 single, 63 widowed (including 3 divorced), and 78 civil condition not stated.

## PNEUMONIA.

TABLE No. 53.

*Mortality from Pneumonia, by Counties, from 1884 to 1893, inclusive.*

COUNTIES.	YEARS.										Average.
	1884	1885	1886	1887	1888	1889	1890	1891	1892	1893

Coös.....	21	20	24	21	33	26	52	57	49	48	35
Total.....	436	504	466	556	628	582	703	673	890	685	612

Table No. 53 gives the mortality from pneumonia, by counties, from 1884 to 1893, inclusive, with the averages for the entire period. The total number of deaths from this disease in 1893 was 685, which is 205 less than was returned the previous year, but which number is still higher than the average for the period covered by the entire table. The influence of influenza was responsible for the high rate of mortality from pneumonia in 1892, and probably accounts for the relatively high death-rate from this disease since 1889.

TABLE No. 54.

*Mortality from Pneumonia from 1884 to 1893, inclusive, by Ages.*

YEARS.	Under 1.	1 to 5.	5 to 10.	10 to 15.	15 to 20.	20 to 30.	30 to 40.	40 to 50.	50 to 60.	60 to 70.	70 to 80.	Over 80.	Unknown.	Total.
1884.....	51	48	3	3	6	27	23	30	36	50	97	54	8	436
1885.....	69	49	8	4	11	15	27	32	37	72	105	74	1	504
1886.....	57	38	13	6	13	17	24	29	49	68	92	53	7	466
1887.....	68	33	7	5	13	28	32	40	48	89	121	68	4	556
1888.....	67	45	6	10	19	40	49	51	62	67	123	81	8	628
1889.....	61	50	8	12	17	29	36	40	48	98	100	79	4	582
1890.....	73	48	9	10	11	35	46	45	79	106	127	107	7	703
1891.....	73	43	15	6	11	43	31	38	74	109	126	95	9	673
1892.....	77	49	13	6	12	41	61	60	95	147	190	128	11	890
1893.....	86	65	15	5	15	36	39	55	60	95	120	88	6	685

Table No. 54 shows the mortality from pneumonia, by ages, from 1884 to 1893, inclusive. It will be seen by a careful study of this table that the great mortality from this disease is among the aged. If this heavy death-rate from pneumonia in persons above 60 years of age were computed upon the living population of the age periods, it would be seen that the death-rate among the aged from pneumonia is really very heavy. It will also be noticed that it is a disease of considerable fatality in infants under one year of age.

TABLE No. 55.

*Mortality from Pneumonia by Months and Quarters, from 1884 to 1893, inclusive.*

YEARS.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Not stated.
1884.....	55	55	51	52	32	13	14	11	5	28	51	67	2
1885.....	53	59	101	95	35	25	13	10	10	33	38	32	...
1886.....	32	44	73	51	51	33	22	18	18	24	46	54	...
1887.....	71	73	85	85	49	17	13	13	14	34	47	54	1
1888.....	72	95	75	73	76	24	16	23	21	43	36	72	2
1889.....	69	66	79	102	51	22	15	19	16	53	41	49	...
1890.....	213	74	69	43	47	35	18	9	23	23	69	79	1

1892.....	384	110	83	86	57	21	5	11	19	21	34	54	5
1893.....	75	71	95	87	67	38	18	14	14	24	48	133	1
Total.....	1,097	707	793	746	560	269	147	135	154	306	447	756	
	2,587			1,575			436			1,499			

Table 55 gives the mortality from pneumonia, by months and quarters, for the ten years covered by the table. The largest mortality for the year 1893 was in December, it being considerably more than double the death-rate from the same disease in the preceding December. The effect of influenza upon the mortality of this disease is apparent in the study of the death-rate by months as exhibited in the above table.

## BRAIN DISEASES.

TABLE No. 56.

*Mortality from Brain Diseases from 1884 to 1893, inclusive.*

YEARS.	DISEASES.						
	Cephalitis.*	Apoplexy.	Paralysis.	Insanity.	Convulsions.	Brain diseases.	Total.
1884.....	120	192	248	22	99	134	815
1885.....	133	206	278	27	93	122	859
1886.....	141	220	249	24	71	127	832
1887.....	117	210	253	25	64	121	790
1888.....	143	243	273	37	88	112	896
1889.....	151	259	196	35	76	126	843
1890.....	186	263	251	28	65	140	933
1891.....	161	283	241	44	78	130	917
1892.....	173	308	209	33	78	140	941
1893.....	208	331	239	26	76	122	1,002
Average.....	153	251	244	30	79	127	883

\*Meningitis and Cerebritis included.

Table No. 56 shows the mortality from brain diseases from 1884 to 1893, inclusive. There is an increased mortality from certain diseases of the brain, notably in cephalitis, under which are classed the inflammatory diseases of the brain. Apoplexy exhibits a higher death-rate than heretofore. The total number of deaths chargeable to brain diseases for the year 1893 is 1,002, the highest number returned for the years embraced in the table.

## DIARRHŒAL DISEASES.

TABLE No. 57.

*Mortality from Diarrhœal Diseases from 1884 to 1893, inclusive.*

YEARS.	DISEASES.					Total of diarrhœal diseases.
	Cholera infantum.	Cholera morbus.	Diarrhœa.	Dysentery.	Enteritis.	
1884 .....	266	21	52	80	69	488
1885 .....	219	20	40	40	57	376
1886 .....	362	14	38	79	53	546
1887 .....	336	16	38	53	57	500
1888 .....	370	8	50	63	39	530
1889 .....	353	12	68	67	56	556
1890 .....	399	12	.....	50	63	524
1891 .....	486	16	46	51	73	672
1892 .....	366	17	53	42	72	550
1893 .....	423	20	50	63	76	632
Average.....	358	16	43	59	61	574

Table No. 57 gives the mortality from diarrhœal diseases for the past ten years. Cholera infantum, which is responsible for the largest number of deaths in this group, shows a higher mortality than for the previous year, and considerably higher than the average for the ten years included in the table. The total number of deaths under this class for the year is 632, the average for the ten years being 574.

## CHOLERA INFANTUM.

TABLE No. 58.

*Mortality from Cholera Infantum from 1884 to 1893, inclusive.*

YEARS.	Deaths.	Percentage of deaths to deaths from all causes.	Death-rates per 10,000 living (estimated population).
1884.....	266	4.29	7.41
1885.....	219	3.53	6.05
1886.....	362	5.63	9.92
1887.....	336	5.18	9.13
1888.....	370	5.39	9.98
1889.....	353	5.27	9.44
1890.....	399	5.41	10.59
1891.....	486	6.64	12.08
1892.....	366	4.58	9.57
1893.....	423	5.52	10.97
Average.....	358	5.14	9.51

In Table No. 58 is exhibited the mortality from cholera infantum for ten years, together with percentages of deaths from this disease to the total number of deaths, and also its death-rate per 10,000 of the living population. The average number of deaths from cholera infantum during this ten year period is 358 annually, while for the year 1893 it was 423, a figure which has been exceeded only once during the period embraced in the table.

TABLE No. 59.

*Mortality from Cholera Infantum, by Ages, from 1884, to 1893, inclusive.*

YEARS.	Under 1.	1 to 5.	5 to 10.	10 to 15.	15 to 20.	20 to 30.	30 to 40.	40 to 50.	50 to 60.	60 to 70.	70 to 80.	Over 80.	Unknown.	Total.
1884.....	214	48	....	....	....	....	1	....	1	....	....	....	2	266
1885.....	186	33	....	....	....	....	....	....	....	....	....	....	....	219
1886.....	283	77	2	....	....	....	....	....	....	....	....	....	....	362
1887.....	284	51	....	....	....	....	....	....	....	....	....	....	1	336
1888.....	298	70	....	....	....	....	....	....	....	....	....	....	2	370
1889.....	297	54	1	....	....	....	....	....	....	....	....	....	1	353
1890.....	343	52	4	....	....	....	....	....	....	....	....	....	....	399
1891.....	409	74	3	....	....	....	....	....	....	....	....	....	....	486
1892.....	320	41	4	1	....	....	....	....	....	....	....	....	....	366
1893.....	369	52	2	....	....	....	....	....	....	....	....	....	....	423

The above table shows the mortality from cholera infantum by years and age periods from 1884 to 1893 inclusive. It will be seen by this table that cholera infantum is almost wholly a disease of early infancy, the majority of deaths occurring from it being in children under one year of age.

TABLE No. 60.

*Cholera Infantum by Cities.*

CITIES.	1883	1884	1885	1886	1887	1888	1889	1890	1891	1892	1893
Manchester.....	131	112	88	122	148	117	86	146	122	102	86

Laconia.....										7	16
Somersworth.....										11	16
Total for cities....	175	157	132	187	198	197	164	235	251	209	226
Total for state....	278	268	219	362	336	370	353	399	486	366	423

The foregoing table shows the mortality from cholera infantum in the cities of the state for the periods given in the table. Over one half of the deaths occurring in this state from this disease is in the cities given, a great majority of which is to be found in the record for Manchester. These facts are exceedingly suggestive in the study of the disease, and should lead the local health authorities, especially in Manchester, to consider methods for reducing infant mortality from this cause.

The next table, No. 61, gives the number of decedents from cholera infantum in the cities and towns returning the greatest mortality from the disease by ages, sex, and months.

TABLE No. 61.  
*Cholera Infantum by Ages, Sex, and Months, particularly showing the number of Decedents in the Cities and Towns, returning the greatest Mortality from the disease, 1893.*

[illegible]

TABLE No. 62.

*Mortality from Cancer, with rates to estimated Population and to Total Mortality from 1884 to 1893, inclusive.*

YEARS.	Deaths.	Death-rates per 10,000 of estimated population.	Ratio to total mortality per 1,000.
1884.....	213	5.93	34.39
1885.....	212	5.85	34.19
1886.....	206	5.64	32.06
1887.....	218	5.92	33.65
1888.....	203	5.47	29.62
1889.....	213	5.70	31.81
1890.....	276	7.33	37.45
1891.....	213	5.61	30.32
1892.....	235	6.14	29.41
1893.....	283	7.34	30.67

Table No. 62 gives the mortality from cancer from 1884 to 1893 inclusive, with ratios to the total mortality and to the estimated population. This table is striking in the uniformity of the mortality from this disease from year to year.

TABLE No. 63.

*Mortality from Diphtheria from 1884 to 1893, inclusive, by Ages.*

YEARS.	Under 1.	1 to 5.	5 to 10.	10 to 15.	15 to 20.	20 to 30.	30 to 40.	40 to 50.	50 to 60.	60 to 70.	70 to 80.	Over 80.	Unknown.	Total.

1893.....	6	23	19	9	1	3	1	1	....	....	....	....	....	63

Table No. 63 shows the mortality from diphtheria by age periods from 1884 to 1893 inclusive. It is gratifying to be able to record the fact that in the year 1893 the death-rate from this disease was lower than for any year heretofore reported. The number of deaths fell off more than one half as compared with the previous year. It will also be observed that there has been a steady diminution in the mortality from diphtheria in New Hampshire since 1889. It is not unreasonable to suppose that this may be in a measure, if not largely, due to the increased activity of local boards of health in carrying out isolation and disinfection.

The next table (No. 64) shows the distribution of diphtheria in the cities and towns returning the greatest mortality from the disease, and also the deaths by ages, sex, and months.

[illegible]

## CROUP.

TABLE No. 65.

*Mortality from Croup from 1884 to 1893, inclusive, by Ages.*

YEARS.	Under 1.	1 to 5.	5 to 10.	10 to 15.	15 to 20.	20 to 30.	30 to 40.	40 to 50.	50 to 60.	60 to 70.	70 to 80.	Over 80.	Unknown.	Total.
1884.....	8	35	6	...	...	...	...	...	...	...	...	...	...	49
1885.....	20	41	9	...	...	1	2	...	1	...	...	...	...	74
1886.....	13	40	10	1	...	...	...	...	...	...	...	...	...	64
1887.....	26	48	7	2	...	...	...	...	...	...	1	...	...	84
1888.....	16	67	9	...	...	...	1	...	...	...	1	...	...	94
1889.....	11	65	11	1	...	...	...	...	...	...	...	...	...	88
1890.....	16	41	6	1	...	...	...	...	...	...	...	...	...	64
1891.....	11	32	10	2	...	...	...	...	...	...	...	...	1	56
1892.....	6	32	5	1	1	...	...	...	...	...	...	...	...	45
1893.....	8	16	10	2	...	...	...	...	...	...	...	...	...	36

Table No. 65 shows the mortality from croup from 1884 to 1893 inclusive, by age periods. This table corresponds in its ratios very closely to the corresponding table (No. 63) relating to diphtheria. It will be seen that, like diphtheria, there has been a constant diminution in the mortality from this disease since 1888. There is no especial reason why croup and diphtheria should be any longer separated in statistical tables, inasmuch as membranous croup and diphtheria are now deemed by the best authorities to be the same disease.

TABLE No. 66.

*Mortality from Croup and Diphtheria from 1884 to 1893 inclusive.*

YEARS.	Deaths.			Percentages of deaths to deaths from all causes.			Death-rates per 10,000 living.		
	Croup.	Diphtheria.	Total.	Croup.	Diphtheria.	Total.	Croup.	Diphtheria.	Total.
1884.....	49	110	159	.79	1.77	2.56	1.36	3.06	4.42
1885.....	74	78	152	1.19	1.25	2.44	2.04	2.15	4.19
1886.....	64	156	220	.99	2.41	3.40	1.75	4.27	6.02
1887.....	84	177	261	1.29	2.73	4.02	2.28	4.81	7.09
1888.....	94	103	197	1.37	1.50	2.87	2.53	2.77	5.30

1892.....	45	134	179	.56	1.69	2.25	1.18	3.50	4.68
1893.....	36	63	99	.47	.82	1.29	.93	1.63	2.57
Total ....	654	1,355	2,009	.....	.....	.....	.....	.....	.....
Average..	65	135	201	.96	1.97	2.84	1.76	3.63	5.39

In table No. 66 croup and diphtheria are combined for the purpose of comparison. The number of deaths, percentages of deaths to deaths from all causes, and the death-rate to each 10,000 living persons from 1884 to 1893 inclusive, is given.

TABLE No. 67.

*Mortality from Typhoid Fever from 1884 to 1893 inclusive.*

YEARS.	Deaths.	Percentages of deaths to deaths from all causes.	Death-rates per 10,000 living (estimated pop- ulation).
1884 .....	137	2.21	3.81
1885 .....	136	2.19	3.75
1886 .....	194	3.01	5.31
1887 .....	134	2.06	3.64
1888 .....	150	2.18	4.04
1889 .....	161	2.40	4.30
1890 .....	143	1.94	3.79
1891 .....	170	2.42	4.48
1892 .....	109	1.36	2.85
1893 .....	121	1.58	3.14
Total .....	1,455	.....	.....
Average .....	145	2.13	3.91

Table No. 67 exhibits the mortality from typhoid fever from 1884 to 1893 inclusive. It will be seen for the latter year that the total number of deaths from this disease was 121, a slight increase over the number reported for the previous year, but lower than the average for the past ten years. The death-rate for the years given is also calculated in percentages.

TABLE No. 68.

1893.....	1	8	3	9	23	29	22	10	5	5	3	1	2	121

Table No. 69 shows the mortality from typhoid fever by age periods from 1884 to 1893 inclusive.

TABLE No. 70.

*Mortality from Bright's Disease, Nephritis, and other Kidney Diseases, and from Dropsy, with Ratios to Total Mortality, from 1884 to 1893 inclusive.*

YEARS.	Total mortality from all causes.	Deaths from Bright's disease, nephritis, and other kidney diseases.	Ratio to total mortality per 1,000.	Deaths from dropsy.	Ratio to total mortality per 1,000.	Totals.	Ratio to total mortality per 1,000.
1884.....	6,194	140	22.60	80	12.91	220	35.51
1885.....	6,201	157	25.32	90	14.51	247	39.83
1886.....	6,426	143	22.25	83	12.92	226	35.17
1887.....	6,479	163	25.16	79	12.19	242	37.35
1888.....	6,854	154	22.47	75	10.94	229	33.41
1889.....	6,696	200	29.87	62	9.26	262	39.13
1890.....	7,368	201	27.28	53	7.19	254	34.47
1891.....	7,310	219	29.96	41	5.61	260	35.57
1892.....	7,988	222	27.99	43	5.38	265	33.17
1893.....	7,663	194	25.32	49	6.39	243	31.71

Table No. 70 shows the mortality from kidney diseases from 1884 to 1893 inclusive, together with ratios to the total mortality per 1,000. It will be seen by this table that the death-rate from kidney diseases for 1893 was a little less than that of the previous year and lower than has been returned since 1888, and the percentage to the total mortality a little lower than has heretofore been recorded.

TABLE No. 71.

*Mortality from Scarlatina from 1884 to 1893 inclusive.*

YEARS.	Deaths.	Percentages of deaths to deaths from all causes.	Death-rates per 10,000 living population.*
1884.....	52	.83	1.44
1885.....	53	.85	1.46
1886.....	21	.32	.57
1887.....	26	.40	.70
1888.....	34	.49	.91
1889.....	18	.26	.48
1890.....	16	.21	.42
1891.....	13	.18	.34
1892.....	27	.33	.71
1893.....	52	.67	1.35
Total.....	312	.....	.....
Average .....	31	.45	.84

\* Population estimated for all but census years.

Table No. 71 shows the number of deaths from scarlet fever for the past ten years. It will be seen that for several years there was a steady diminution in the mortality from this disease down to and including 1891, since which time the mortality has increased, and largely during the past year.

TABLE No. 72.

*Mortality from Scarlatina from 1884 to 1893, inclusive, by Ages.*

YEARS.	Under 1.	1 to 5.	5 to 10.	10 to 15.	15 to 20.	20 to 30.	30 to 40.	40 to 50.	50 to 60.	60 to 70.	70 to 80.	Over 80.	Unknown.	Total.

## MEASLES.

TABLE No. 74.

*Mortality from Measles from 1884 to 1893, inclusive.*

YEARS.	Deaths.	Percentages of deaths to deaths from all causes.	Death-rate per 10,000 living population.*
1884.....	3	.04	.08
1885.....	45	.72	1.24
1886.....	18	.28	.49
1887.....	39	.60	1.06
1888.....	55	.80	1.48
1889.....	16	.23	.42
1890.....	9	.12	.23
1891.....	19	.26	.50
1892.....	24	.30	.62
1893.....	32	.41	.83
Total.....	260	.....	.....
Average .....	26	.38	.69

\* Population estimated for all but census years.

Table No. 74 shows the mortality from measles for the ten years included in the table. The number of deaths returned from this disease in 1893 was 32, an increase over the last four years, and greater than has been returned since 1888.

TABLE 75.

*Mortality from Measles from 1884 to 1893, inclusive, by Ages.*

YEARS.	Under 1.	1 to 5.	5 to 10.	10 to 15.	15 to 20.	20 to 30.	30 to 40.	40 to 50.	50 to 60.	60 to 70.	70 to 80.	Over 80.	Unknown.	Total.
1884.....	1	1	....	....	1	....	....	....	....	....	....	....	....	3
1885.....	12	26	5	1	1	....	....	....	....	....	....	....	....	45
1886.....	5	13	....	....	....	....	....	....	....	....	....	....	....	18
1887.....	19	10	2	1	3	....	2	1	....	1	....	....	....	39
1888.....	14	20	6	3	2	2	5	1	1	....	....	1	....	55
1889.....	2	6	1	....	2	2	1	....	1	....	....	....	1	16
1890.....	5	4	....	....	....	....	....	....	....	....	....	....	....	9
1891.....	5	6	2	....	2	....	1	1	....	1	....	....	1	19
1892.....	7	11	....	1	1	3	....	....	1	....	....	....	....	24
1893.....	9	14	3	2	1	1	1	....	....	....	1	....	....	32

Table No. 75 gives the mortality from measles for the ten years included by age periods. It will be seen by this table that this is a disease chiefly of early life. It is also demonstrated by this table that the disease is of too great importance to be ignored so far as restrictive measures are concerned by local boards of health and the public.

## NOTE ON STILLBIRTHS.

Under the law a stillbirth should be returned as a *birth* and also as a *death*. In the birth returns for 1893 429 stillbirths were reported, while in the death returns only 203 were recorded. This accounts for the difference in the stillbirth statistics of Tables No. VII and VIII, and Tables No. XV and XX, the two former being the more reliable.

counties.....	235
months and quarters.....	237
Scarlatina, deaths from, in 1893, by counties.....	257
1884-1893.....	256
by ages.....	257
Zymotic diseases, deaths from, 1884-1893.....	213

## TABLES.

Table I. Showing births for 1880, 1881, 1882, 1883, 1884, 1885, 1886, 1887, 1888, 1889, 1890, 1891, 1892, and 1893.....	4
I. Showing marriages for 1880, 1881, 1882, 1883, 1884, 1885, 1886, 1887, 1888, 1889, 1890, 1891, 1892, and 1893.....	5
I. Showing deaths for 1880, 1881, 1882, 1883, 1884, 1885, 1886, 1887, 1888, 1889, 1890, 1891, 1892, and 1893.....	6
II. Population of 1890; births, marriages, and deaths, with percentage of each to one thousand of the population, for the year ending December 31, 1893.....	7
III. Births, marriages, and deaths for the year ending December 31, 1893.....	8-29
IV. Births, by sex and months, by counties, 1893.....	30
V. Twin births by months, counties, sex and nativity.....	32-33
VI. Births showing age of mother, number of child by nativity.....	34-35
VII. Still-births, showing number of child and age of mother.....	36
VIII. Still-births, by sex, parentage, and months, by counties.....	37
IX. Marriages by counties and nativity, 1893.....	38
X. Marriages by months and counties, 1893.....	39
XI. Ages of brides.....	40
XII. Interesting facts in relation to marriages, 1893.....	41
XIII. Divorces decreed by the supreme court of New Hampshire, in the year 1893, as returned by the clerks of the several counties, 42	
XIV. Causes upon which divorces were decreed for eleven years, 1882-1893, inclusive, by counties.....	43

Table XV. Causes of death, arranged by towns and counties.....	44-131
XVI. Recapitulation of the causes of death by classes and orders, by counties.....	182
XVII. Deaths by ages, sex, and months, by counties and towns.....	134-159
XVIII. Deaths by ages, sex, and months, by counties.....	160
XIX. Causes of death alphabetically arranged by ages, sex, and months.....	162-173
XX. Deaths by sex, age, and month.....	174
Table 1. Population by counties in 1880 and 1890 .....	177
2. Estimated population of New Hampshire for each year from 1880 to 1893, inclusive.....	177
3. Births, marriages, and deaths, with the estimated population rates, for 1884 to 1893, inclusive.....	178
4. Births in cities for 1893, with rate per 1,000.....	179
5. Percentage of American and foreign births, by counties, 1893.....	180
6. Marriage-rate for 1882 to 1893, inclusive.....	181
7. Marriages by counties from 1882 to 1893, inclusive.....	182
8. Marriage-rates for 1882 to 1893, inclusive, according to estimated population of each year, by counties .....	183
9. Marriages and marriage-rates, by months and quarters, from 1883 to 1893, inclusive.....	184
10. Marriages for eleven years, 1883 to 1893, inclusive, by ages.....	185
11. Marriages according to nativity.—Percentages 1882 to 1893, inclusive .....	185
12. Proportion of American to foreign born persons married, for 1882 to 1893, inclusive.....	186
13. Percentages of American and foreign born persons married, by counties, for 1882 to 1893, inclusive.....	187
14. Divorces decreed from 1870 to 1893, inclusive, by counties.....	189
15. Ratio of divorces to marriages from 1882 to 1893, inclusive .....	190
16. Ratio of divorces to marriages, by counties, for 1893.....	191
17. Deaths and death-rates from 1884 to 1893, inclusive.....	192
18. Deaths and death-rates, by counties, from 1884 to 1893, inclusive, figured on estimated population.....	193
19. Percentages of deaths, by quarters, from 1884 to 1893, inclusive....	194
20. Mortality of males and females compared, 1884 to 1893, inclusive....	195
21. Deaths at age periods by percentages, for 1883 to 1893, inclusive....	196
22. Deaths at different periods, compared with the number living at the same period, 1893 .....	197
23. Deaths by ages and sex from 1884 to 1893, inclusive.....	198
24. Percentages of deaths by ages and sex to total mortality, from 1884 to 1893, inclusive .....	200
25. Deaths of children under five years of age, by seasons, 1893.....	202
26. Deaths by seasons, 1893.....	203
27. Nativity of persons deceased for 1893, by counties.....	204
28. Nativity of persons deceased from 1884 to 1893, inclusive.....	205
29. Deaths in 1893, of persons aged one hundred years or more.....	206
30. Causes of death, by classes, 1884 to 1893, inclusive.....	207
31. Percentage of causes of death, by classes, 1884 to 1893, inclusive....	208
32. Causes of death, by classes and counties, 1893.....	209
33. Mortality from prominent zymotic diseases from 1884 to 1893, inclusive.....	211
34. Mortality from principal constitutional diseases, 1884 to 1893, inclusive.....	213
35. Mortality from principal local diseases, 1884 to 1893, inclusive.....	214
36. Mortality from principal developmental diseases, 1884 to 1893, inclusive .....	215

Table 37. Mortality from twenty prominent causes, 1884 to 1893, inclusive ...	216
38. Mortality from consumption from 1884 to 1893, inclusive.....	218
39. Mortality from consumption, by counties, with percentages of deaths to total mortality, from 1884 to 1893, inclusive.....	219
40. Deaths from pulmonary consumption, by seasons, ages, and nativity, 1893, for the city of Manchester.....	220
41. Deaths from pulmonary consumption, by seasons, ages, and nativity, 1893, for the city of Concord.....	221
42. Deaths from pulmonary consumption, by seasons, ages, and nativity, 1893, for the city of Nashua.....	222
43. Deaths from pulmonary consumption, by seasons, ages, and nativity, 1893, for the city of Portsmouth.....	223
44. Deaths from pulmonary consumption, by seasons, ages, and nativity, 1893, for the city of Dover.....	224
45. Deaths from pulmonary consumption, by seasons, ages, and nativity, 1893, for the city of Keene.....	225
46. Deaths from pulmonary consumption, by seasons, ages, and nativity, 1893, for the city of Rochester.....	226
47. Deaths from pulmonary consumption, by seasons, ages, and nativity, 1893, for the city of Laconia.....	227
48. Deaths from pulmonary consumption, by seasons, ages, and nativity, 1893, for the city of Somersworth.....	228
49. Percentage of deaths from consumption to the total mortality of the cities of the state for the years 1883 to 1893, inclusive.....	226
50. Deaths from consumption, by ages and sex, by counties, for 1893.	230
51. Deaths from consumption, by months and sex, by counties, for 1893.....	232
52. Deaths from consumption, by nationality, civil condition, and sex, by counties, for 1893.....	234
53. Mortality from pneumonia, by counties, from 1884 to 1893, inclusive .....	235
54. Mortality from pneumonia, from 1884 to 1893, inclusive, by ages...	236
55. Mortality from pneumonia, by months and quarters, from 1884 to 1893, inclusive.....	237
56. Mortality from brain diseases, 1884 to 1893, inclusive.....	238
57. Mortality from diarrheal diseases, 1884 to 1893, inclusive.....	239
58. Mortality from cholera infantum from 1884 to 1893, inclusive.....	240
59. Mortality from cholera infantum from 1884 to 1893, inclusive by ages .....	241
60. Cholera infantum, by cities.....	242
61. Cholera infantum, by ages, sex, and months, particularly showing the number of decedents in the cities and towns returning the greatest mortality from this disease.....	243
62. Mortality from cancer, with ratios to estimated population and to total mortality from 1884 to 1893, inclusive, by ages.....	246
63. Mortality from diphtheria from 1884 to 1893, inclusive, by ages ....	247
64. Diphtheria, by ages, sex, and months, particularly showing number of decedents in the cities and towns returning the greatest mortality from this disease.....	248
65. Mortality from croup from 1884 to 1893, inclusive, by ages.....	250
66. Mortality from croup and diphtheria from 1884 to 1893, inclusive..	251
67. Mortality from typhoid fever from 1884 to 1893, inclusive.....	252
68. Mortality from typhoid fever, by counties, with percentages of deaths to total mortality, from 1884 to 1893, inclusive.....	253
69. Mortality from typhoid fever from 1884 to 1893, inclusive, by ages,	254

Table 70. Mortality from Bright's disease, nephritis, and other kidney diseases, and from dropsy, with ratios to total mortality, from 1884 to 1893, inclusive.....	255
71. Mortality from scarlatina from 1884 to 1893, inclusive.....	256
72. Mortality from scarlatina from 1884 to 1893, inclusive, by ages.....	257
73. Deaths from scarlatina, by counties, 1893.....	257
74. Mortality from measles from 1884 to 1893, inclusive.....	258
75. Mortality from measles from 1884 to 1893, inclusive, by ages.....	259
